Summary

I am a self-motivated **Full-Stack Web Developer** with a knack for simple and efficient problem solving. I am a recent graduate of a 24-week coding bootcamp at the University of Washington, Seattle in partnership with edX. I am eager to take all I've learned to the next level with real-world experience that pushes me to my limits and allows further growth as a web developer.

Work Experience

Laboratory Technician, MCL Food Testing

Seattle, WA

September 2019 - Present

- Proficiency in a vast range of microbiological methods in order to perform ISO-certified testing and ensure the highest quality of food safety testing for clients.
- In-depth knowledge of quality control procedures with adherence to standard operating procedures (SOPs).
- Database maintenance in order to keep accurate records and documentation.
- Strong written and verbal communication skills to effectively document procedures and results.
- Ability to identify and resolve technical issues or machine malfunctions in a laboratory setting, ensuring smooth operations and minimal downtime.
- Accurately interpreted laboratory results and made decisions accordingly in a high-stress, fast-paced environment
- Train new employees in various facets of laboratory work in accordance with SOPs.
- Operated effectively in a team-based environment, collaborating with colleagues and supervisors to achieve shared objectives.
- Participated in monthly laboratory meetings to provide insights in how to streamline quality control and procedures.

Student Coordinator, Local Point at the University of Washington

Seattle, WA

November 2015 - September 2018

- Worked in a fast paced environment to expedite food for thousands of students a day.
- Acted as a student supervisor to manage a team of more than 100 students through different departments all of which were responsible for a wide array of tasks that I ensured were completed correctly.
